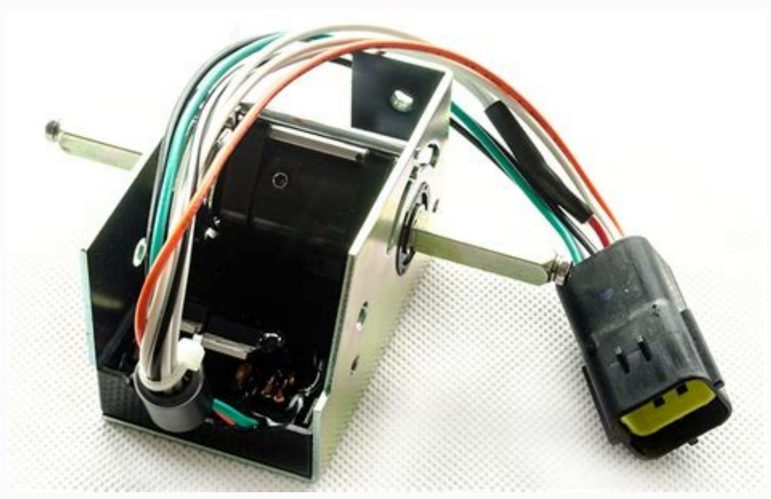
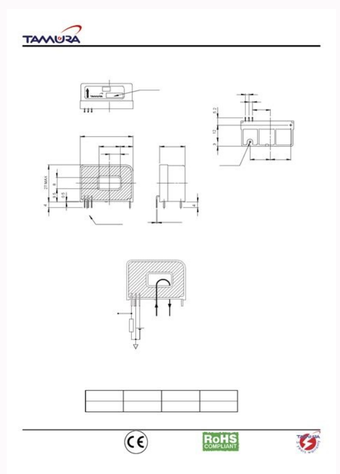
44e hall effect sensor datasheet full pdf





44e hall sensor pdf. 44e hall effect sensor datasheet.

Image not available forColor: To view this video download Flash Player Use the 3144E switch type Hall sensor.3. When the sensor senses a magnetic field, the digital output is low and the signal light is on; if no magnetic field is sensed, the digital output is high and the signal is not lit.4. Has a power indicator and a signal indicator.5. Output form: digital switch output (0 and 1) AO port is invalid6. The sensor has three pins pin1-Vcc, pin2-GND, and pin3-Output. The output voltage is set by the supply voltage and varies in proportion to the strength of the magnetic field. The operating temper ature range of these linear Hall sensors is -40oC to 85oC, appropriate for commercial, consumer and industrial applications. The integrated circuitry features low noise output, which makes it unnecessary to use external filtering. The AH44E is a small, versatile linear Hall-effect device that is operated by the magnetic field from a permanent magnet or an electromagnet. The open-circuit output stage consists of a magnetic sensing circuit whose input is magnetically induced and the output is a digital voltage signal .The sensor has the following characteristics: small volume, high sensitivity, fast response, good temperature performance, high precision, and high reliability.Features1. Description:The 3144E Hall switch IC uses the Hall effect principle, a magnetic-sensing circuit fabricated using semiconductor integration technology, which is composed of a voltage regulator, a Hall voltage generator, a differential amplifier, a Schmitt trigger, a temperature compensation circuit, and a collector. Working voltage: 3.3-5V2. It also includes precision resistors to provide increased temperature stability and accuracy. Part Number : AH44E Function : Hall Effect Sensor Manufacturers : Allegro Package : TO-92UA Type Image : Description : The sensor IC used is AH44E unipolar digital Hall Effect sensor by allegro. Adopt LM393 comparator output, the model is clean, the waveform is good, the driving ability is strong, more than 15mA.7. It is provided with fixing bolt holes for easy installation and fixing.8. Can be used for motor speed measurement, position detection, etc.
